

Missouri Statewide Safety Belt Survey

Seat Belt Usage by Survey Site

***2020 Survey Data
Maps & Site Locations***

This book contains the survey site results of the 2020 Statewide Safety Belt Survey conducted June 1 – 14, 2020.

Twenty roadway segments were surveyed in accordance with National Highway Traffic Safety Administration (NHTSA) guidelines in 28 Missouri counties, totaling 560 observed sites. The observations were conducted on all days of the week during daylight hours between 7:00 AM and 6:00 PM, with each observation period lasting exactly 45 minutes. Passenger cars, van/minivans, sport utility/crossover vehicles, pickup trucks and commercial vehicles weighing less than 10,000 pounds are all qualifying vehicles for the survey and are subject to observation, regardless of the licensed state.

The 28 counties were selected from a pool of 63 counties that represented 85% of crash fatalities in the State of Missouri from 2012-2016. Per NHTSA guidelines, Missouri reselected counties/observation sites based on updated crash data for the 2018-2022 survey years.

Some county maps have road segments that cross county lines. These segments begin within the survey county. Each road segment has a start crossroad and an end crossroad, and from the start to the end of the segment there were no vehicle entrances or exits. Therefore, regardless of the observation point along the segment (at the beginning, in the middle or at the end), the vehicles on the segment and in the county were counted.

The counties surveyed were:

Audrain	Howell	Platte
Benton	Jackson	Saline
Buchanan	Jasper	St. Charles
Butler	Jefferson	St. Clair
Callaway	Johnson	St. Francois
Christian	Lafayette	St. Louis City/County
Clay	McDonald	Stoddard
Franklin	Miller	Webster
Gasconade	Pettis	Wright
Greene		

Based upon a total of 116,224 vehicle occupants observed, the 2020 statewide seat belt use rate on Missouri roadways was found to be 86.1 %, which is a 1.6% decrease from the 2019 survey result.

The following pages include maps and spreadsheets of each county indicating the location of the observations, the number of observations by site, and the observed safety belt use by site. *Note – the “County Use Rate (Un-Weighted)” is*

appropriate for determining the use by county; the “County Use Rate (Weighted)” is only used in determining the overall statewide usage rate.

This information should be very beneficial to target efforts to increase safety belt usage in these areas, whether through education or enforcement.

If you have any questions, please contact the MoDOT Highway Safety & Traffic Division at 1-800-800-BELT (2358).

2020 Survey County Results

Based on Weighted Data Only

County	Number of Observations	Weighted Percent
<i>Audrain</i>	<i>1,923</i>	<i>82.0</i>
